## Zirconia Bridges are Strong and Beautiful

Recent advances in computer-generated CAD/CAM designed restorations and advances in high strength Zirconia provide us with the ability to create strong, beautiful and highly accurate bridges in a fraction of the time of traditional bridges. These bridges are metal free and computer milled from one solid block of Zirconia, resulting in a durable, chip resistant restoration with a natural translucence that can hide underlying discolorations.

The CAD/CAM design results in a superior fit, feel and functionality. You can also have your new Zirconia Bridge placed in about 3 days, much less time than the 3 weeks for a traditional bridge. Best of all, a Zirconia Bridge is only \$975 per unit. Ask your dentist if a high strength Zirconia Bridge is the right choice for you.

## Flexible Partial's Are A Popular Choice

Our Flexible Partial's continue to be a very popular choice among our patients. Flexible Partial's are made with Duraflex, a revolutionary new thermoplastic, which makes them extremely durable; yet lightweight, thin and flexible with a minimal risk of breakage.

Because they are custom fitted to your mouth in our in-house lab, Flexible Partial's offer a comfortable fit and feel. They are also completely metal free, giving a translucent, natural look that virtually disappears in the mouth!

Premium Flexible Partial's are only \$1,095 per arch, and comes with a 5 year warranty and includes months routine post delivery care that covers all adjustments, relines, rebase and repairs if required. Best of all, you can receive your new Flexible Partial usually in 3 days. Ask your dentist at your next visit if Flexible Partial's are the right choice for you.
