## Zirconia Bridges are Strong and Beautiful!

Recent advances in computer-generated CAD/CAM designed restorations have led to advances in high-strength Zirconia and the ability to create strong, beautiful and highly accurate bridges in a fraction of the time of traditional bridges. These bridges are metal free and computer milled from one solid block of Zirconia, resulting in a durable, chip resistant restoration with a natural translucence that can hide underlying discolorations.

The CAD/CAM design results in a superior fit, feel and functionality. You can also have your new Zirconia Bridge placed in about 3 days, much less time than the 3 weeks for a traditional bridge. Best of all, a Zirconia Bridge is only \$925 per unit. Ask your dentist if a high strength Zirconia Bridge is the right choice for you.
