Dental Implants, The Gold Standard for Tooth Replacement.

Are you struggling with the loss of your teeth due to periodontal disease, injury, or other reasons? This year might be a great time to look into dental implants. Dental Implants are a modern and effective solution with numerous benefits which can effectively replace one or more permanent teeth lost due to various factors, such as injury, decay, or infection. Unlike traditional dentures, dental implants provide enhanced stability and comfort, allowing you to regain up to **90% of your chewing ability**.

In addition to their functionality, dental implants are designed to look natural, which can help boost your confidence and appearance. By choosing dental implants, you can avoid the inconvenience commonly associated with dentures, as implants won't slip, produce noise, or cause bone loss. With a **success rate of 98%** and over 40 years of use, dental implants are considered the gold standard for tooth replacement.

If you're considering dental implants, we urge you to reach out to us at (417) 466-7196 to schedule a consultation with Dr. Collins. We genuinely look forward to discussing the benefits of dental implants and how they can positively impact your life.
